

3P Filter Collector

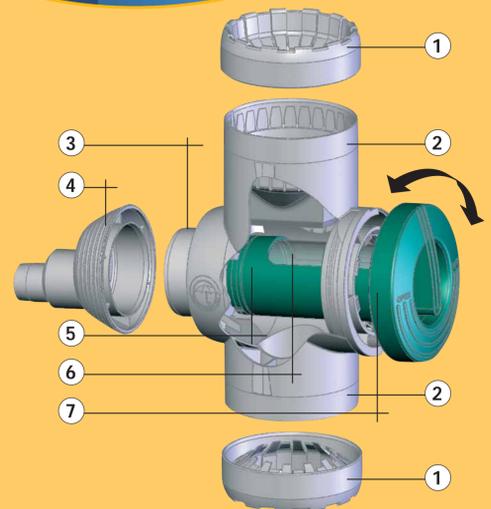

3P Filter Collector

Filters and collects rainwater for the best tank water quality. (Removes leaves and so reduces risk of disease carry over etc, no dark sludges, less algae, less blocking).

The Filter Collector leads cleaned water to the storage tank, with high efficiency under normal rainfall, (85 to 95%).
Dirt passes to waste.
The filter can act as the overflow outlet for the tank once full.
With 2 positions open or closed.
For installation in downpipes at 68 mm and 110 mm, adapters included.
The outlet connector fits 75 mm, or adapters fit 50 mm and 32 mm hosepipes.
Durable high quality plastic.
The mesh is made of Stainless Steel.

- ① Rainwater is channelled from the filter entrance to the sieve cartridge.
- ② Dirt is rinsed to the sides, and to waste.
- ③ Cleaned water is led through the cartridge's outlet channel to storage.

- ① Reduction at 68 - 100 mm.
- ② Connector for downpipes 110 mm.
- ③ Outlet connection at 75 mm Ø.
- ④ Adapter for connection at 50 mm/32 mm.
- ⑤ Guide plates.
- ⑥ Stainless Steel filter mesh.
- ⑦ Settings for open/closed conditions.
